ABOUT CPCP™ CERTIFIED PROJECT CONTROL PROFESSIONAL™ CERTIFICATION PROGRAM

PCWI™ Project Control World Institute™'s CPCP™ Certified Project Control Professional™ program is a global based credential that recognizes Project Control Officers (PCOs) who require a general understanding about the application, value and benefits derived from the use of project controls, planning and scheduling, risk management and Earned Value Management (EVM) for the effective management and oversight of projects and programs within their organizations.

The CPCP™ Certified Project Control Professional™ credential certification is a unique management level and professional development program and course designed for PCPs and PCOs in both Government and Industry who are eager to achieve total project and program management, execution and delivery successes

The CPCP™ Certified Project Control Professional™ certification program is aimed at the present and next generation of government and private sector project controls leaders and managers working for dynamic global companies and firms; international organizations and institutions; and government agencies/departments/ministries who need to broaden their horizons in the field and dimensions of project controls, Earned Value Management (EVM), planning and scheduling, risk management, project management and effective program governance; and enhance their prospects of achieving successful project and program delivery.

The CPCP™ Certified Project Control Professional™ credential certification training program offers the participant with 3 days of intensive level training in project controls; estimating, planning, scheduling and budgeting; risk management; Earned Value Management and EIA 748-C Earned Value Management (EVM) Industry standards; fraud prevention; managing dispute and claims; and contract management for projects and programs
